

Black's Island

ST JOSEPH BAY, FLORIDA

Location

Black's Island is a seven acre private island located in Florida's Forgotten Coast, surrounded by St. Joseph Bay Aquatic Preserve, a 73,000 acre richly biodiverse area just 35 miles south of Panama City. Accessible by boat, seaplane, helicopter and mainland ferry transfer via 30A and Panhandle area airports, Black's Island features private luxury cottages, observation decks, an oceanfront pool, central ecolodge, and secluded beaches. Marine life is abundant in the area.

Black's Island is an ideal filming location - spectacular, serene, and safe. Thanks to its unique geography, Black's Island easily accomodates major productions in need of a "social bubble", including those that require mainland health screening to meet current union safety regulations.
